DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Bruckner on February 27, 2007.

The application has been amended as follows:

Please replace claim 12 with the following:

12. (Currently amended) An apparatus monitoring HVAC control functions, comprising:

- a microcontroller;
- a digital temperature sensor coupled to the microcontroller;
- a display coupled to the microcontroller;
- ~~a set of cursor buttons coupled to the microcontroller;~~
- a first data structure of personal identification numbers coupled to the microcontroller;
- a second data structure of historical system usage data coupled to the microcontroller;
- an upload capable connector coupled to the microcontroller and to the first data structure;
- a billing computer coupled to the second data structure, wherein the billing computer uses historical system usage data associated with personal identification numbers to provide historical billing data;
- a real time clock coupled to the microcontroller; and
- a back up power supply coupled to the real time clock;

Art Unit: 2125

~~wherein users associated with personal identification numbers of the first data structure are billed for HVAC as a function of historical system usage data of the second data structure.~~

2. Claims 12, 14-27, and 31-33 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. While U.S. Patent No. 5,289,362 to Liebl et al in view of U.S. Patent No. 5,958,016 to Chang et al show a thermostat system with pin number login, neither of these references taken alone or in combination with the prior art of record show wherein the billing computer uses the pin number historical login information to calculation the billing numbers for HVAC user usage. It is this billing feature based on pin number logins through a thermostat in combination with the remaining elements and features of the invention, that the applicant's invention defines over the prior art of record.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
